## INVITES YOU TO OUR CONTINUING EDUCATION LECTURE:

**Speaker: Michael S. Block, DMD**  
**Friday, October 20, 2017**

“Key Concepts and Pros/Cons with Implant Temporization” AND  
“Implant Complications And Esthetic Concerns for Both the Surgeon and  
the Restorative Dentist “

**Location:** Country Club of Pittsfield  
639 South Street, Pittsfield, MA 01201

**8:00am –4pm**

Continuing Education:  
6 Credits

**Registration Deadline:** Friday, October 13, 2017

**Register by October 4th  
and **SAVE!**  
**DEADLINE**  
October 13th**

**DATE:** Friday, October 20, 2017

**TIME:** Registration 8:00 a.m.  
Seminar 8:30 a.m. to 4:00 p.m.  
Lunch 12:00 p.m. to 1:00 p.m.

**FEES:** \$225 ADA Member  
**(\$210 by October 4th)**  
\$260 Non-ADA Member  
**(\$245 by October 4th)**  
\$95 Staff/Spouse/Retired Dentist  
**(\$85 by October 4th)**  
Fee includes lunch and coffee breaks

**PLACE:** Country Club of Pittsfield  
639 South Street  
Pittsfield, MA 01201  
**(413) 447-8500**

**CEU/AGD Approved—6 Hours**

**INFORMATION:** Barbara Desroches

**Key Concepts and Pros/Cons with  
Implant Temporization**

Treatment planning and sequencing of treatment for single tooth and full arch fixed provisionalization, including how to diagnose potential esthetic and maintenance problems and how to utilize digital methods to enhance the patient's therapy.

**Learning objectives:**

At the end of this session the attendees will:

- Understand different options for choosing when to use preoperative fabricated provisionals to chairside fabricated provisionals.
- Be able to determine the type of fixed full arch prosthesis to choose for each patient.
- Understand the critical factors to determine implant position depending on prosthesis choice.
- Understand how to use digital methods to enhance the day of treatment and minimize chair time for surgeon and restorative dentist.

**Implant Complications And Esthetic  
Concerns for Both the Surgeon and the  
Restorative Dentist**

This presentation will review common in the trenches failures of dental restorations and implant restorations. The presentation will show common solutions to these problems based on collection of pre-operative physical findings that can then be used to follow algorithms of treatment. Orthodontic extrusion, hard and soft tissue grafting, realistic expectations, over the top cases, and how to restore the patient back to their pre-treatment condition will be shown in detail.

**Learning objectives:**

At the end of this session the attendees will:

- Understand two methods to improve tissue thickness and health around implants placed into the esthetic zone.
- Understand the principles of using dynamic navigation to accurately place implants into the esthetic site.
- Be able to utilize common examination facts to determine the ideal treatment plan to idealize implant restorations in the esthetic zone.
- Understand how to manage complications in the esthetic zone.

**Dr. Michael Block** graduated from the University of Rochester in 1975, attaining both a BA in Biology and a BS in Biomedical Engineering. He completed his dental training at the Harvard School of Dental Medicine in 1979, receiving his D.M.D. cum laude in a special field. He completed his residency program in Oral and Maxillofacial Surgery at the LSU School of Dentistry in 1983. He remained at the LSU School of Dentistry and achieved the academic rank of Professor in the Department of Oral and Maxillofacial Surgery. Currently he is in private practice dedicated to patient oriented care. Dr. Block is the editor-in-chief of five textbooks on dental implants, *Endosseous Implants for Maxillofacial Reconstruction*, *Implants in Dentistry*, *Color Atlas of Dental Implant Surgery*; the 4<sup>th</sup> edition was published in 2014. He is Past President of the Academy of Osseointegration, and has been program chairman for three of their annual programs. Dr. Block serves on the American Association of Oral and Maxillofacial Surgeons (AAOMS) Committee on Continuing Education. Dr. Block has been an examiner for the American Board of Oral and Maxillofacial Surgery. He is a Section Editor on Dental Implants for the Journal of Oral and Maxillofacial Surgery. Dr. Block is particularly interested in the translation of technology for efficient and predictable reconstruction of the jaw to provide ideal bone for implant placement and esthetic replacement of missing teeth, the use of multiple techniques and implants to reconstruct significant atrophic conditions, and interceptive strategies for rehabilitating extraction sites with implant restorations.
